Tel : +91 44 66603918

To Whomsoever it may concern

We, Kone elevators Ltd, situated in Sriperumbudur, Chennai Tamilnadu are one of the largest manufacturers of Elevators products having several plants across India.

Fitch Fuel Catalyst, being manufactured by Advanced Power Systems Inc, USA, was introduced to us for the purpose of improving energy efficiency and reducing pollution causing toxic emission on any equipment using any form of hydrocarbon to produce energy. The Fuel used in our premises is L.P.G with average fuel consumption to over 1000 Kg per day for a Heat treatment furnace.

A pilot project was undertaken by us and KPK IMPEX COMPANY, Pune, to observe the performance of catalyst after installing it in the fuel line of the Furnace. We had monitored the performance closely for 2 months and have recorded energy saving @ 5%

We are satisfied with the performance and may be recommend to make use of 'FITCH Fuel Catalyst' in other plants as well.
